Mr. Martin,

Apologies, but we have 1 additional responsive record related to request #1 below.

This request is complete and we consider the request officially closed and the statute of limitations has begun to run, however, if you have any questions, please notify us within 30 days from the date of this notification.

Sincerely,

Danielle Vaughn

Subject: Public Records Request

Dear Mr. Martin,

We have received your public records requests on April 23, 2026 which are as follows:

1). Specifically, I am requesting all Public records of all training, including dates, of all Everett Public Facilities District Public Records officers and records managers from January 1, 2021, through April 23, 2026.

2). Specifically, I am requesting all Public records of the date that all Everett Public Facilities District Public Records officers and records managers assumed responsibilities as a public records officer or records manager at the Everett Public Facilities District from January 1, 2021, through April 23, 2026.

For item #1, we have provided responsive records as attachments to this email.

For item #2, the Everett Public Facilities District has no responsive records to this request. An agency is required to identify a public records officer pursuant to RCW 42.56.580 and identify their name and contact information. However, RCW 42.56 does not require any formal process and therefore we have no records responsive to your request. Further, an agency is not required to create records in response to a request that do not exist at the time of the request.

This request is complete and we consider the request officially closed and the statute of limitations has begun to run, however, if you have any questions, please notify us within 30 days from the date of this notification.

Sincerely,

Danielle Vaughn
